

CSA1505 - CLOUD COMPUTING AND BIG DATA ANALYTICS

Experiment-4

1. Create a simple cloud software application for Library book reservation system for SIMATS library using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as Title of the book, author, publications, Year, edition, no of copies, Rack no, status (taken/returned) etc.

AIM:

To develop a simple Library Book Reservation System for the SIMATS Library using Zoho Creator (Cloud Service Provider) to demonstrate the Software as a Service (SaaS) model. The application allows users to manage book reservations, availability, and return status through a cloud-based platform.

PROCEDURE:

Log in to Zoho Creator.

Create a new application named SIMATS Library Book Reservation System.

Design a form with the following fields:

- Student Name
- Student ID
- Department
- Mobile Number
- Title of the Book
- Author
- Publication
- Year of Publication
- Edition
- Number of Copies
- Rack Number
- Reservation Date
- Return Date
- Status (Available / Taken / Returned)

Configure the required fields using text boxes, number fields, date fields, and drop-down lists.

Create workflows to:

- Automatically set the Reservation Date to the current date and time.

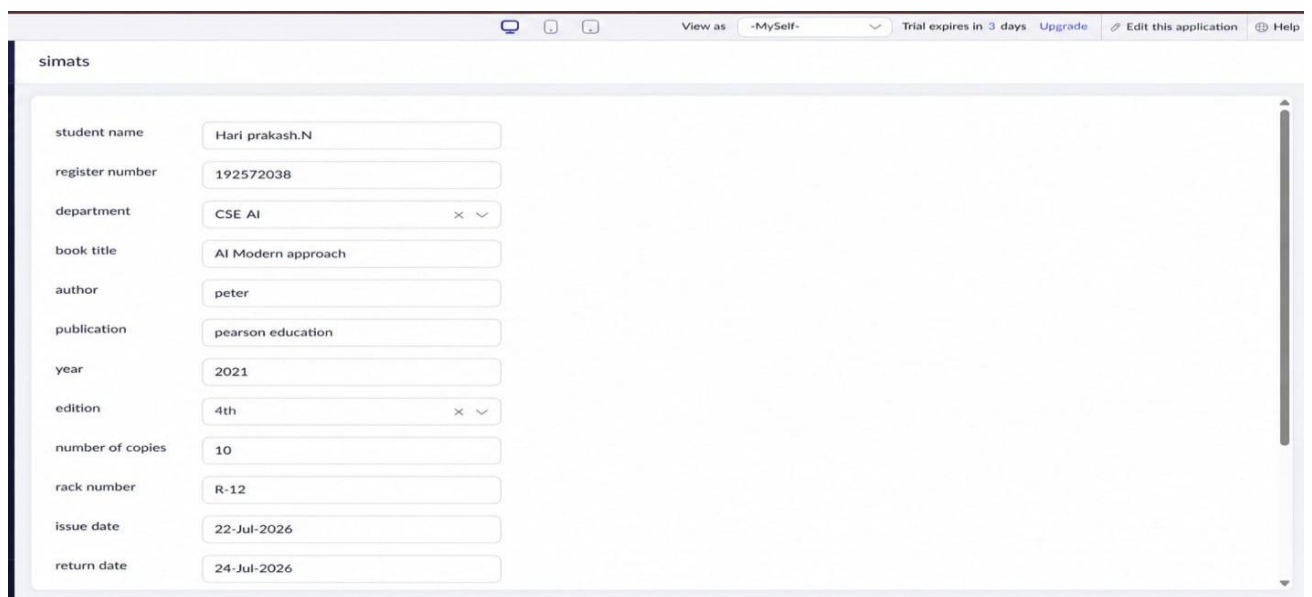

- Automatically set the Status to Taken when a book is reserved.

Save and publish the application.

Enter sample book and student details, then submit the reservation.

Verify that the reservation details are stored correctly and the workflows execute successfully.

INPUT:

simats

student name: Hari prakash.N

register number: 192572038

department: CSE AI

book title: AI Modern approach

author: peter

publication: pearson education

year: 2021

edition: 4th

number of copies: 10

rack number: R-12

issue date: 22-Jul-2026

return date: 24-Jul-2026

OUTPUT:

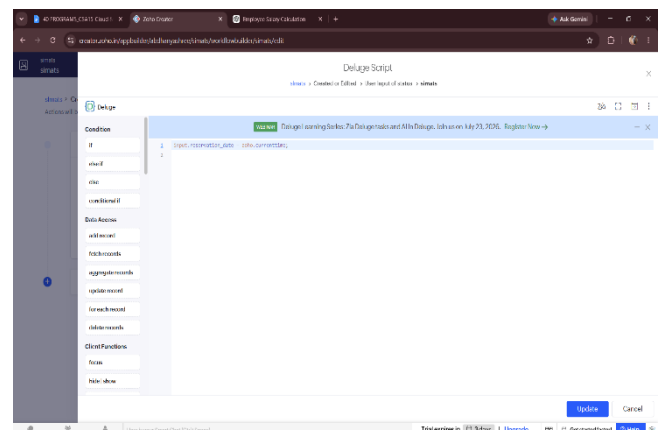

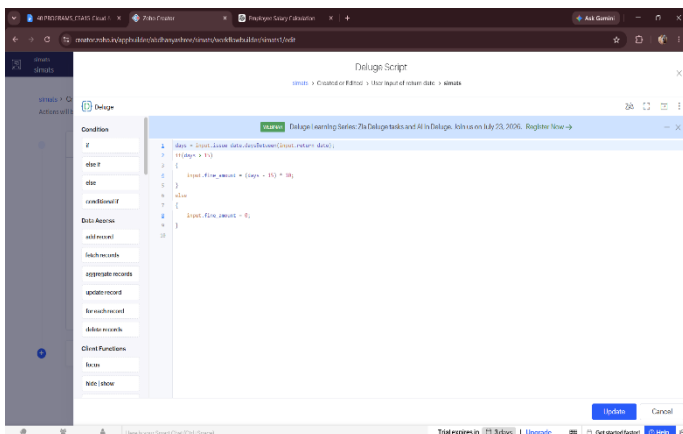

simats Report

student name	register number	department	book title	author	publication	year
Hari prakash.N	192572038	CSE AI	C Program	handerson	Steve education	2020
Naveen	192525206	AI	AI Modern approach	peter	pearson education	2021

DESIGN:

The screenshot displays the SIMATS web application interface. On the left is a dark sidebar with the SIMATS logo and navigation links: 'simats', 'simats', and 'simats Report'. The main content area is titled 'simats' and contains a form with the following fields: 'student name' (text input), 'register number' (text input), 'department' (dropdown menu with '-Select-' selected), 'book title' (text input), 'author' (text input), 'publication' (text input), 'year' (text input with '#####' placeholder), 'edition' (dropdown menu with '-Select-' selected), 'number of copies' (text input with '#####' placeholder), 'rack number' (text input), 'issue date' (text input with 'dd-MMM-yyyy' placeholder), and 'return date' (text input with 'dd-MMM-yyyy' placeholder). A vertical scrollbar is visible on the right side of the form.

WORKFLOW:

RESULT:

A cloud-based SIMATS Library Book Reservation System was successfully developed using Zoho Creator. The application enables users to reserve library books, maintain book details, track reservation and return dates, and manage the status of books (Available, Taken, or Returned). The automated workflows update the reservation date and book status, demonstrating the Software as a Service (SaaS) model in cloud computing.
